

STOP THE HASSLES

Unlocking Life's Potential with BrainRx

Many parents wonder: "Does my daughter have tools to learn easily? Will my son ever focus or comprehend material without me constantly by his side?"

It's no longer enough to get good grades. The demands of sports, work, college-prep, and more only make fast efficient thinking a necessity. Unlike tutoring, BrainRx's intense brain training exercises improve skills that boost brain function. Students gain the extra time and efficiency needed to succeed—regardless of their current academic level.

It's a bold approach, but improving cognitive efficiency allows our learning experts to create a personal strategy that can restore your child's love of learning and make homework easier.

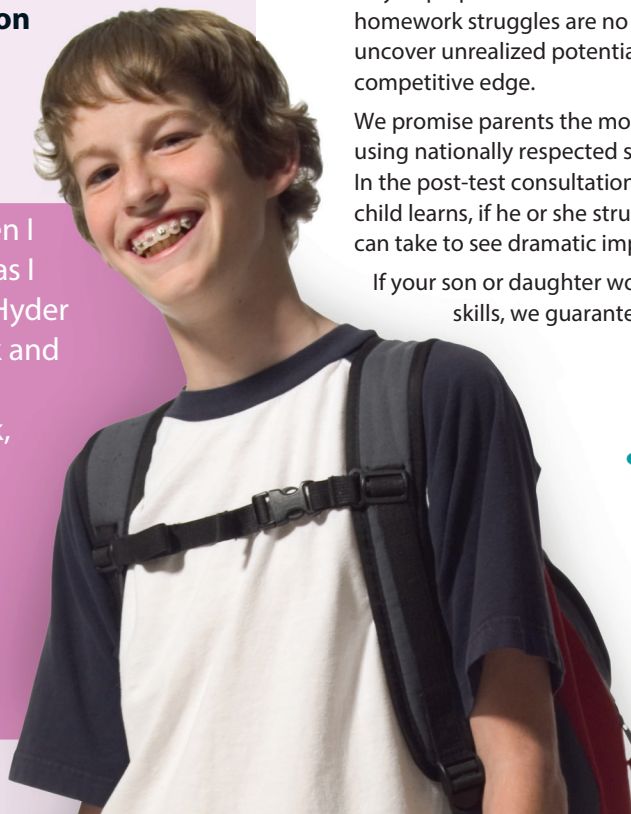

If your child is experiencing hours of homework, repeated frustration, declining self-esteem, or if he or she dislikes school, please act now.

Cognitive skills testing and training identifies the root causes of the homework and learning struggles—and overcomes them. Increased cognitive skills strength translates into an increased ability to learn and read; attitude, confidence, self-esteem, and grades all improve.

If fussing, fighting, and arguing over homework is a part of your regular routine, call and find out how Mind Links can help. Call Now on +971509179113

“ I can't do it. I'll just pump gas when I grow up.' My son said this in frustration as I tried to help with his homework. Since Hyder completed BrainRx training, homework and learning is a lot easier. He's much more independent, keeps track of homework, tests, and projects with less help. We used to set aside 5 hours to study for tests. He now gets higher grades with only 30 minutes...and he no longer needs curriculum assistance. We feel great about his future. ”

—Angie M., son Hyder, age 12

One simple question:

Are weak cognitive skills causing your student's homework struggles?

BrainRx excels in helping parents provide the tools their children need to successfully conquer the frustration and stress that often surrounds homework. **Here's why:**

Fact!

Students who struggle with excessive homework do so for a reason. Too much

homework or taking too long to complete it are often signs of potential underlying learning skills weaknesses. Isn't it time to uncover the root causes of homework hassles?

Fact!

Individual cognitive skills weaknesses are the most likely reason. Specific underlying learning skills are absolutely necessary for easy, successful learning. If skills weaknesses remain hidden, students have to work too hard to learn. Professional skills testing can pinpoint WHY your child may struggle.

Fact!

Cognitive skills can be improved and strengthened for life. One-on-one training with a professional trainer and simple at-home follow-up is HOW your child's underlying skills can grow. BrainRx can show you the steps toward more efficient learning skills; and soaring self-esteem, renewed confidence, and increased

One simple answer:

Have your child's skills tested.

Professional cognitive skills testing from BrainRx is the best way to pinpoint the exact cause of any learning problem—homework struggles are no exception. BrainRx testing can also uncover unrealized potential in advanced students looking for a competitive edge.

We promise parents the most accurate information possible using nationally respected skills, achievement, and reading tests. In the post-test consultation, you'll discover exactly how your child learns, if he or she struggles (and why), and the steps you can take to see dramatic improvement this year.

If your son or daughter would benefit from stronger cognitive skills, we guarantee we can make a positive change.
